PRACTICAL ASSIGNMENT 3

General Instructions

- Complete both questions using Microsoft PowerPoint.
- Prepare exactly 10 slides for each question.
- Use clear, readable text and relevant images.
- Apply suitable slide transitions and animations where requested.
- Use a consistent, professional and appealing slide design.

QUESTION 1: Children and Computer Technology

Scenario: The Government of Zimbabwe is looking forward to introducing computers to primary school children in the near future.

Task: Using your PowerPoint skills, create a 10-slide presentation that summarizes the article entitled "Children and Computer Technology".

Your presentation must:

- Summarize the key ideas from the article clearly and concisely.
- Include relevant images that support the content.
- Use appropriate animations for important slide elements.
- Use suitable slide transitions throughout the presentation.
- Apply an appealing, consistent and professional design.

Important: Keep the presentation to exactly 10 slides. Avoid copying the entire article onto the slides; summarize the main points.

QUESTION 2: Basic Rules of Soccer

Scenario: Assume that you are a soccer coach for NewDawn United. You have been asked to introduce new recruits to the basic rules of soccer.

Task: Create a 10-slide PowerPoint presentation that summarizes the information provided below and explains the basic rules of the game to the new recruits.

Your presentation must:

- Summarize the supplied information using clear and concise points.
- Include relevant soccer images and/or diagrams.
- Apply suitable animations to slide content.
- Apply appropriate slide transitions.
- Use an appealing and consistent design.

Information to Summarize

1. Introduction to Soccer Soccer is one of the simplest sports in the world, which may be one reason it is also the most popular sport in the world.

2. Size of the Field The field must be rectangular. The length should be a minimum of 100 m (110 yds) and a maximum of 110 m (120 yds). The width should be a minimum of 64 m (70 yds) and a maximum of 75 m (80 yds).

5v5 Soccer: For a 5v5 soccer experience, the supplied material recommends using futsal regulation-size dimensions to encourage technical play rather than a kick-and-chase style.

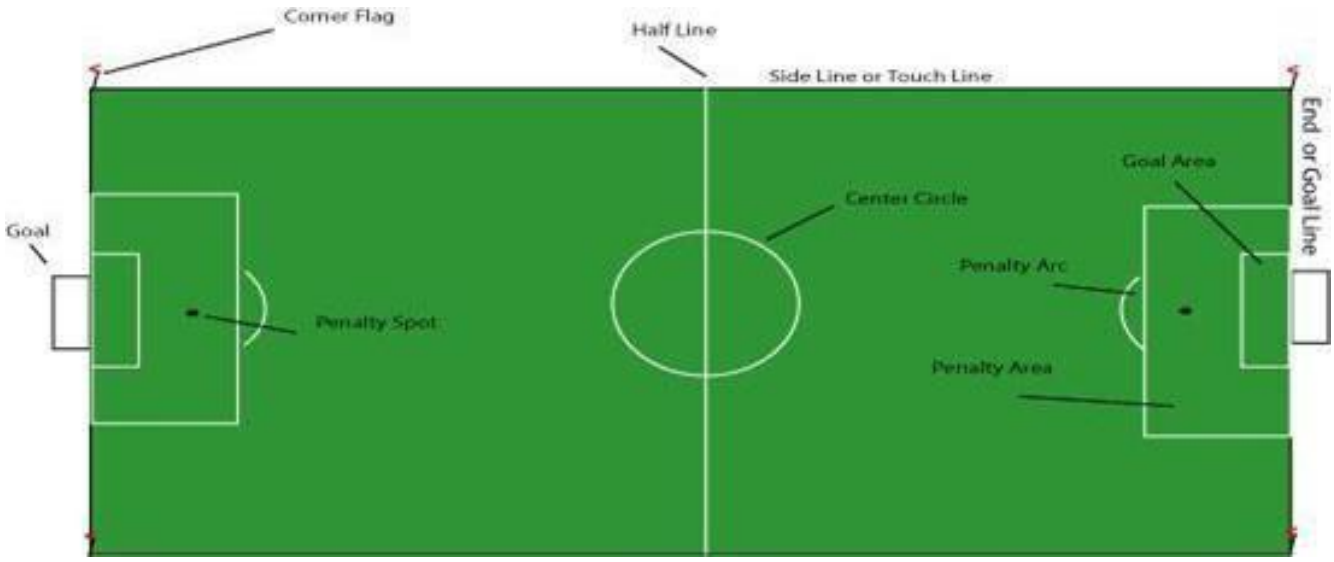

Figure 1: Basic soccer field layout

3. Ball Size by Age

Age Group	Recommended Ball Size	Key Point
3–5 years	Size 4	Size 3 may be suitable for indoor/backyard play, but children may outgrow it quickly.
6–12 years	Size 4	Used for development until about 11–12 years; the supplied material also notes that a futsal ball is size 4.
12 years–Adult	Size 5	Standard size for professional and adult soccer.

4. Number of Players Soccer is played by two teams, preferably with equal numbers of players. The maximum is 11 players per team: one goalkeeper and 10 field players. Team size may be reduced for younger age groups. The supplied material gives examples of 8 players for some youth leagues, 6 per side for under-5s, and recommends 5v5 futsal rules for development.

5. Substitutions Officially, the supplied material states that three substitutions are allowed per game, although modified rules may differ. Youth leagues may have no limit on substitutions. According to the material, a substitution is made when the ball is not in play and the team has possession, for example during its own throw-in or goal kick. The material notes that futsal rules may differ.

6. Starting the Game The game starts at the centre of the field. The team taking the kick-off passes the ball forward to a teammate after the referee's signal. The opposing team is not allowed to enter the centre circle until the kick-off is taken.

7. Ball in Play The ball remains in play while it stays within the field, including when it is touching a boundary line. The supplied material also states that contact with the goal post, corner flag or referee does not by itself put the ball out of play. The referee is treated as a fixture of the field.

8. Scoring a Goal The objective is to score more goals than the opposing team within the specified playing time. The ball must completely cross the goal line for a goal to be scored. If the ball remains in contact with the goal line, it is not considered a goal.

9. Duration of the Game A standard professional game is no more than 90 minutes, divided into two 45-minute halves with a 15-minute half-time break. Youth matches may use shorter halves of approximately 15–30 minutes, with a 7–10 minute half-time break.

10. Use of Hands Generally, only the goalkeeper may use their hands. The supplied material defines a handball area as extending from the fingers to the upper arm and notes that the shoulder is legal to use. It also states that a goalkeeper cannot use their hands when a teammate intentionally kicks the ball back to them. Coaches should not teach an intentional back-pass to the goalkeeper as an option.

11. Out of Bounds If the ball crosses the side line, the opposing team receives a throw-in. If the ball crosses the goal line, the restart depends on which team touched the ball last: a corner kick is awarded when the defending team touches the ball out, while a goal kick is awarded when the attacking team kicks the ball out.

Suggested 10-Slide Structure for Question 2

Slide	Suggested Content
1	Title slide – NewDawn United: Basic Rules of Soccer
2	Introduction to soccer and the objective of the game
3	Soccer field size and field layout
4	Ball sizes according to age
5	Players and team sizes
6	Substitutions and starting the game
7	When the ball is in play
8	How a goal is scored and game duration
9	Use of hands and goalkeeper rules
10	Out-of-bounds rules and key takeaways

Presentation quality reminder: Use large, readable fonts, high contrast between text and background, clear images, short bullet points, and consistent formatting. Do not overcrowd slides with paragraphs.
